

# Application In Animals Feed

## Advantages of feeding EVMix™

## Description & Introduction

EVMix™ is a natural occurring mixture of carotenes (predominantly beta-carotene), and vitamin E complex (tocotrienols and alpha-tocopherol), extracted from Non-GMO Malaysian palm fruit oil.

These natural compounds contribute to optimal health, growth and reproduction in animals.

Beta-carotene and Vitamin E are potent antioxidants that strengthen the antioxidant network, protecting cells against the damaging effects of excess free radicals.

Research has shown that beta-carotene plays important role in improving immune response, reproductive performance, milk yield, meat color stability, growth, and offspring survival.

Vitamin E is essential for animal reproduction while also promotes nerve health, skin health, and a shiny hair coat in companion animals. Supplementation of palm vitamin E in layers has been shown to produce specialty eggs with reduced cholesterol level, while enriched with vitamin E (tocotrienol) and pro-vitamin A carotenes.

## Specifications

EVMix™ 2%,  
Powder

EVMix™ 6%,  
Oil Concentrate

	EVMix™ 2%, Powder	EVMix™ 6%, Oil Concentrate
<b>Total Mixed-Carotene</b>	20mg/g Minimum	60mg/g Minimum
<b>Vitamin A Activity</b>	24,000 IU/g Minimum	72,000 IU/g Minimum
<b>Total Vitamin E Complex</b>	2mg/g Minimum	5mg/g Minimum
<b>Shelf Life</b>	12 months	24 months
<b>Standards</b>	E160a: Beta-carotene (Provitamin A) is a registered additive in the European Union Register of Feed Additives pursuant to Regulation (EC) No. 1831/2003.

## Applications & dosages

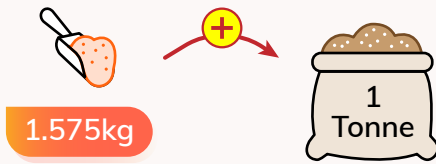

EVMix™ can be added in compound feed formula, or blended into animal feed directly prior to feeding.

gm per tonne feed	Cattle	Dairy Cows	Sows	Piglets	Layers	Dogs
EVMix™ 2%	1575	3675	5250	1575	1575	1575
EVMix™ 6%	525	1225	1750	525	525	525

Above is a dosing guide for different animal species. The dosage has been adjusted appropriately to account for process losses and stability.

### Cattle

#### EVMix 2% (powder)

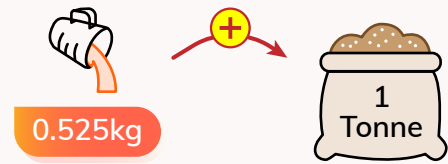

Add **1.575kg EVMix 2%** into one tonne of feed

### Piglets

### Layers

### Pet Dogs

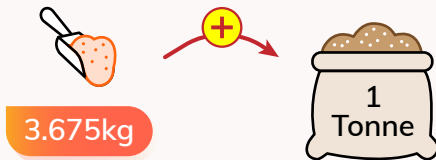

#### EVMix 6% (liquid)

Add **0.525 kg EVMix 6%** into one tonne of feed

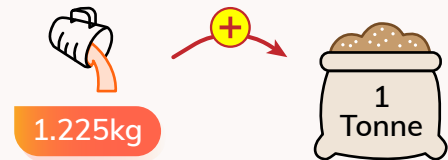

### Dairy Cows

#### EVMix 2% (powder)

Add **3.675kg EVMix 2%** into one tonne of feed

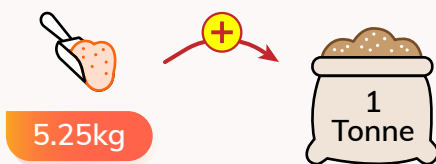

#### EVMix 6% (liquid)

Add **1.225kg EVMix 6%** into one tonne of feed

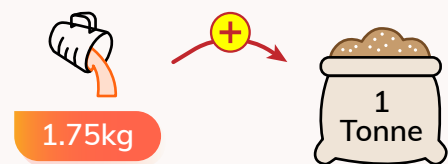

### SOWS

#### EVMix 2% (powder)

Add **5.25kg EVMix 2%** into one tonne of feed

#### EVMix 6% (liquid)

Add **1.75kg EVMix 6%** into one tonne of feed
